FOREWORD

EURATEX | THE VOICE OF THE EUROPEAN TEXTILE AND APPAREL INDUSTRY

The textile and fashion industry is going through turbulent times; geopolitical unrest, the energy crisis, drop in consumer confidence, the subsidy race and other state interventions create a tough economic climate for textile entrepreneurs to prosper. On top of that, the EU is moving forward with the implementation of its dedicated EU Textile Strategy. That means 16 pieces of legislation on the table, which will reshape the regulatory context for the textile and fashion industry. Much of that legislation is still under discussion at the level of EU institutions, member states and many other stakeholders who want to promote their specific perspective. But change is coming – that’s clear. In such climate of economic and regulatory uncertainty, it is critically important to communicate about the performance and tendencies within the textile industry. Therefore “facts and figures” are essential, to ensure a quality debate which is based on science and not ideology; to make sure we develop a regulatory framework which is ambitious but realistic.

As illustrated by the data presented in this publication, the European textile industry is a very wide and diverse ecosystem, designing products which are essential in so many other sectors – construction, automotive, medical, agriculture, etc. And of course, our industry stands out for its high quality garments, sold by the world’s leading fashion brands.

The bulk of our industry is small, family owned enterprises, often with decades of tradition and craftsmanship. But increasingly, we notice textile start-ups, developing new sustainable products and introducing new technologies. Some of them will grow and become our new captains of the textile industry.

The purpose of this publication is to develop a broader understanding on what “textiles” is all about – nearly 200.000 companies and 1,3 million workers, committed to quality and proud of their products. EURATEX and its member associations will continue to promote and defend these companies, to ensure we maintain a competitive European textile industry.

EURATEX, based on IHS

EU EXPORTS BY PRODUCTS

EXPORTS' GROWTH IN EUROPE HAS BEEN DRIVEN BY THE CLOTHING SUB-SEGMENT

Extra EU exports by product family, 2023

- Women's clothing (incl. workwear)
- Other garments*
- Men's Clothing (incl. workwear)
- Technical textiles (excl. woven fabrics)
- Woven fabrics
- Yarns and Threads
- Natural fibers
- Knitted fabrics
- Carpets
- Home textiles
- Man-made fibres

* Other garments (knitted and woven): babies' garment, T-shirts, pullovers, special garments, hosiery and clothing accessories.

European clothing

is the most attractive product category to customers worldwide.

Unless specified, EU refers to EU27

SUSTAINABILITY

CIRCULAR ECONOMY

GREEN TRANSITION PLAYS AN IMPORTANT ROLE FOR BRANDING, REPUTATION AND COMPETITIVENESS

Technologies	Already using
Recycled materials	32,0%
Energy-saving technologies	27,8%
Recycling technologies	24,3%
Clean production	24,3%
Bio-based materials	23,3%
Renewable energies	18,0%
Biotechnology	8,3%
Additive manufacturing	6,8%
Carbon capture technologies	6,0%
Hydrogen	1.3%

32%
of the textile SMEs indicated the use of recycled materials *

*: Results of the EMI survey conducted with 326 textiles companies

42%
of surveyed companies adopted a green technology or adopted a new green business model*

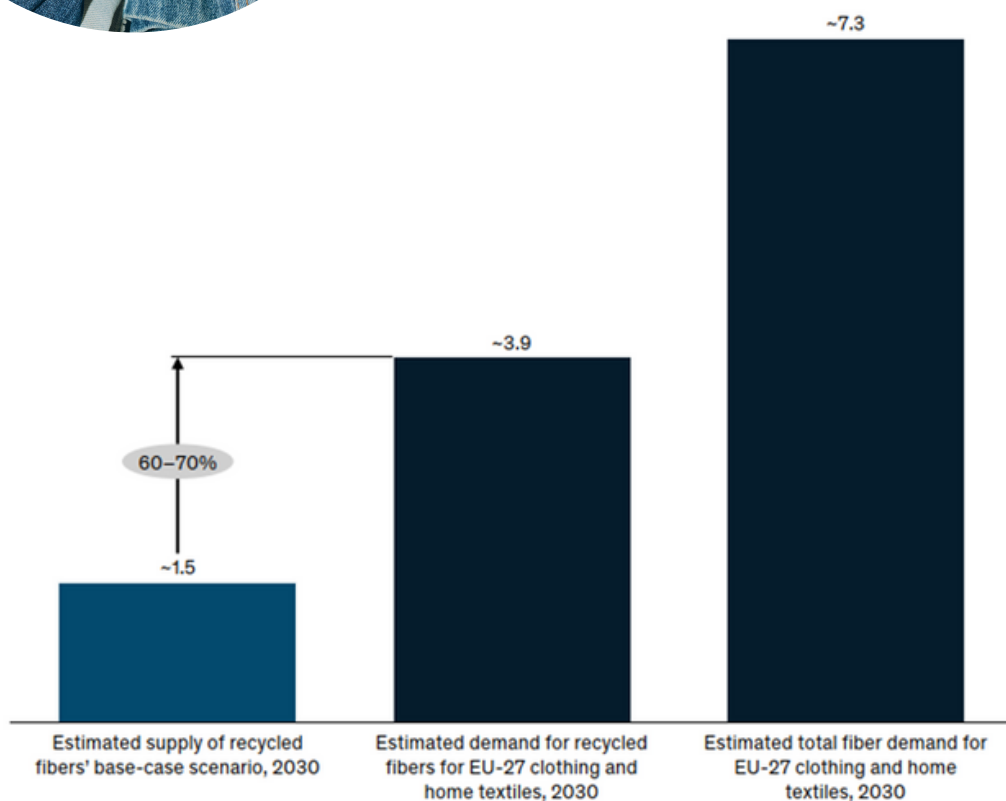

Source: European Commission
"Monitoring the twin transition of industrial ecosystems", DG Grow 2023

CIRCULAR ECONOMY

“EU-27 AND SWITZERLAND COULD APPROACH A SUPPLY GAP OF 60 TO 70% FOR RECYCLED FIBERS BY 2030”

Estimated supply and demand of **recycled textile material** in tons¹, 2030.

1. Demand calculated based on European brand survey executives' ambition for recycled fiber uptake in 2025, extrapolated to 2030. Share applied to total textile waste volumes. Supply calculated based on this report's base-case scenario in which 50 percent of post-consumer household waste is calculated and 70 percent of textile waste available to recycling is fiber-to-fiber recycled.

Source:
“Scaling textile recycling in Europe-turning waste into value”, Mc Kinsey, 2022.

SUSTAINABILITY

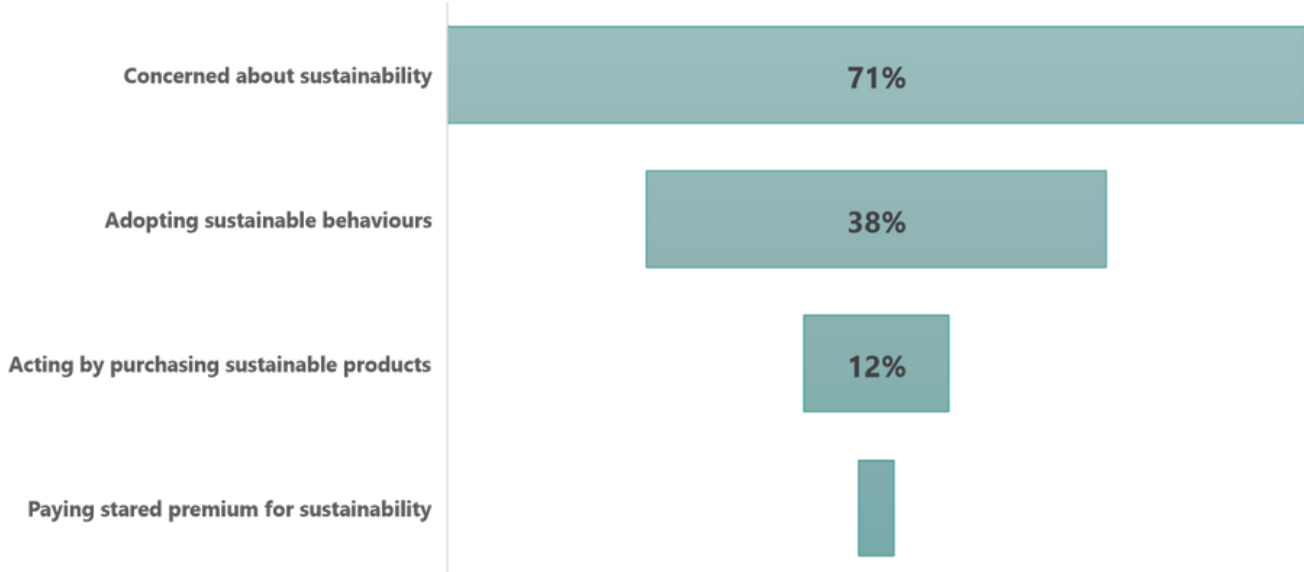

CIRCULAR ECONOMY

" AWARENESS ON THE RELEVANCE OF SUSTAINABILITY IS RISING AMONG CONSUMERS, BUT THERE IS A MISMATCH BETWEEN THEIR ATTITUDE, BEHAVIOUR, AND PERCEPTION "

71%
of consumers say they are concerned about sustainability when purchasing apparel products, but only
3%
have paid a premium for more sustainable purchases

Apparel : purchase habits of 19,000 consumers across US, Japan, Germany, France, Italy, China, India, and Brazil (% of consumers at various stages)

Source:
"Just Fashion Transition 2022", Venice sustainable fashion forum;
based on BCG climate and sustainability consumer survey, 2022

ENERGY

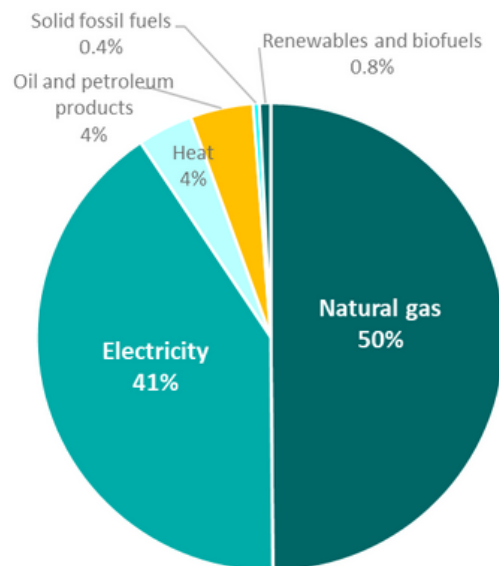

FINAL CONSUMPTION IN THE TEXTILE, CLOTHING AND LEATHER INDUSTRIES (TCLF)

Natural gas

is the main energy source for the industry. Green transition requires considerable innovation and investment.

Energy consumption in the TCLF* sector, by fuels

*TCL: Textile, Clothing, Leather and Footwear
Source:
EUROSTAT

SUSTAINABILITY

AIR EMISSION CO2

OUTSTANDING IN ENERGY EFFICIENCY: EVERY YEAR THE INDUSTRY USES LESS ENERGY, HENCE LESS CO2, WHILE INCREASING THE VALUE ADDED

Evolution of the CO2 emission intensity in the TCLF sectors*
2008-2021 (unit: Grams/€)

* TCLF: Textile, clothing, leather and footwear

Energy efficiency is of critical importance for the textile and clothing industry and to reduce CO2 emissions.

EUROPE – WORLD CAPITAL OF TEXTILE RESEARCH & INNOVATION

THE EU27 RECORDS THE HIGHEST NUMBER OF INDUSTRIAL DESIGNS' APPLICATIONS FILED IN TCLF* SECTORS

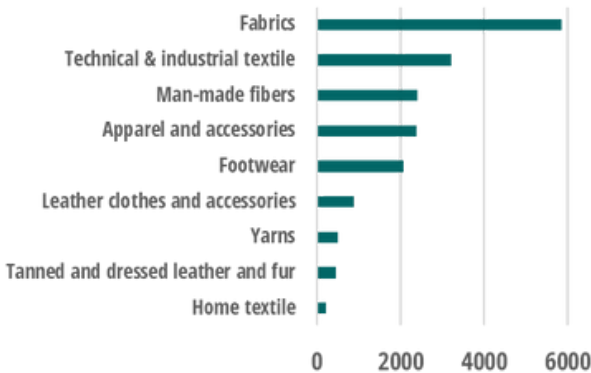

EU27: 184,000 Industrial designs (number 2022)

EU27: 705,000 Trademarks registered (number 2022)

EU27: 18,000 patents¹ (number 2015-2023)

*TCLF : Textile, clothing, leather and footwear
Source: CSIL elaboration based on Orbis IP and WIPO IP Statistics Data Center.

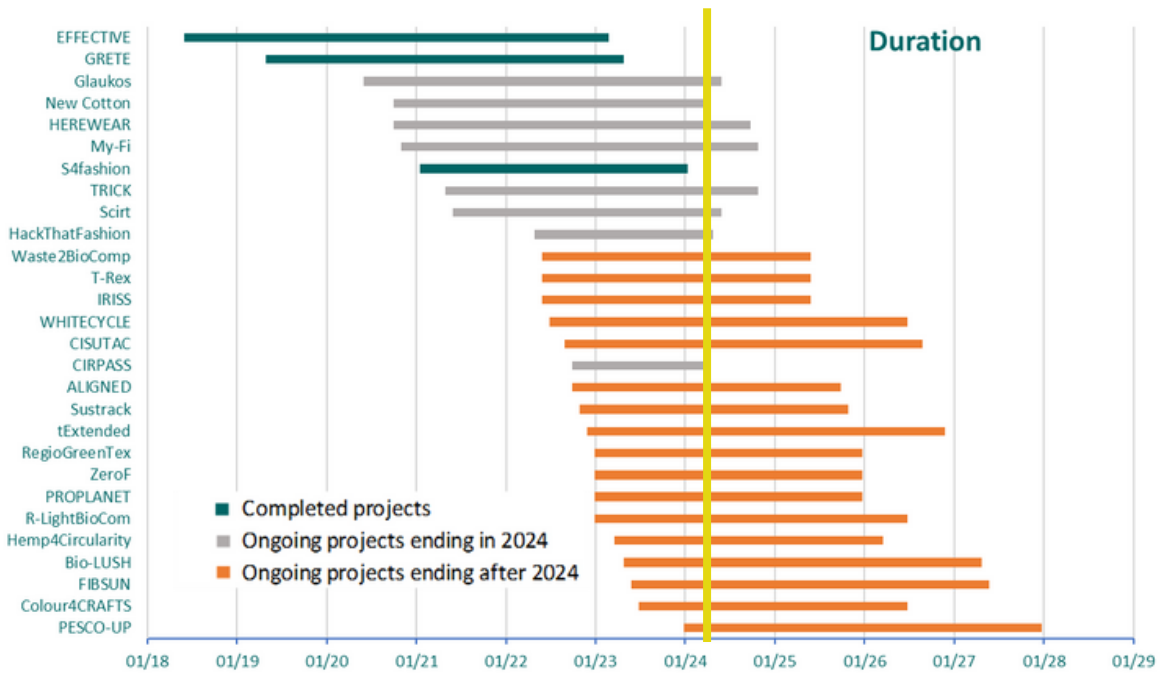

(1) The number of patents includes:

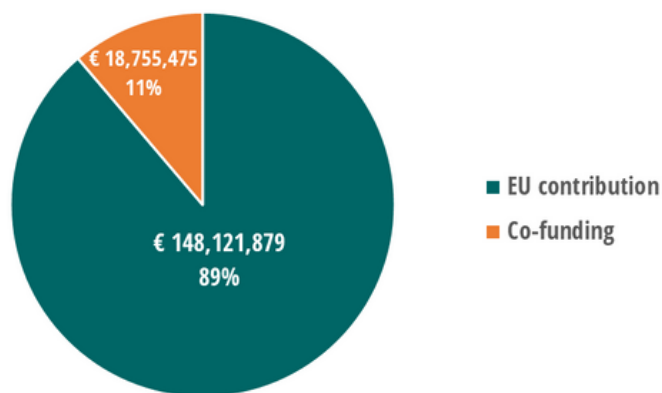

- The 2022 and 2023 data are incomplete due to delays in patent registration.
- Both patents and utility models. The latter the prevalent form of IPR in the textile industry.
- All applications: both "granted" and only "non-granted" applications.
- The unit on which the statistics are made are the families of patents (not individual patents). Patents that make small, incremental changes to the same innovation are part of the same family.

EUROPE – HIGH LEVEL OF EU SUPPORT FOR RESEARCH & INNOVATION ON TEXTILE SUSTAINABILITY

“The Ecosystex member projects”

Funding
Total budget: 167€ million

*TCLF : Textile, clothing, leather and footwear
